

TP41-EP Switch matrix by vk3pe

based on original by Jack and AI V011

This Schematic and PCB has been designed to use a very low cost PB switch which is available in Australia but I have not been able to find if it's available in other countries, so far.

It is available in a number of colours and is a round button type, simplifying front panel construction.

PCB sent to jlc 28th July 2026

16TH JULY:- ADDED ALTERNATE 3V SUPPLY FOR SW MATRIX

July 6th 2022 vk3pe
