

tinySA RF SECTION V2 per M0WID pinout

On V1.0 pcb only,
TX_CS AND RX_CS
are reversed !

This Schematic is based on original work by PDOEK for a simple and low cost Spectrum Analyzer, known as "tinySA".
The Schematic now uses an ESP32 Micro instead of original NANO board.
Bill of material, software and other build documents will soo be available on GITHUB and a link will be placed here for that ASAP.

29th April minor tidy up
31st mar swapped tx and rx CS's PCB = tinySA_V2b.PCB
V2 PCB 290320 DRAFT
